

Georgia Society of Dermatology and Dermatologic Surgery

GSDDS Dermoscopy Course

Saturday, February 21, 2015

9am – 12pm

Piedmont Hospital

McRae Auditorium, 1984 Building

General Information

Activity Description

A 3 hour Dermoscopy Workshop that will cover all of the essential information you need to know to have a practical, clinically oriented understanding of dermoscopy. There will be a comprehensive review of the two-step algorithm, and all of the global patterns and local criteria needed to diagnose melanocytic, nonmelanocytic, benign and malignant skin lesions. There will be many case presentations with both clinical and dermoscopic images and an interactive self-assessment quiz.

Target Audience

The intended audience is dermatologists, surgeons, oncologists, physicians in internal medicine, family practice, and general practice.

Learning Objectives

1. Use the two-step algorithm when evaluating skin lesions.
2. Recognize all of the important dermoscopic criteria and patterns.
3. Use pattern analysis to evaluate melanocytic skin lesions.
