Meeting Description

The Annual Meeting of the Georgia Society of Dermatology and Dermatologic Surgery is a three-day program designed for Dermatologists, Dermatologic Surgeons, Dermatopathologists and other interested health care providers. We strive to create a program that is educational and informative using both nationally renowned speakers as well as our own physician members. We also include a resident abstract competition that includes the participants from Emory University and Medical College of Georgia at Georgia Regents University Residency programs.

Objectives

Attendees will be updated on a broad range of new developments in dermatology and acquire a better understanding of advances in medical and surgical therapies. They will also gain greater insight into current trends in practice management as well as financial and medical/legal challenges facing today's clinician.

At the conclusion of this learning activity, participants will have

- Increased knowledge of recent medical advances in the diagnosis, management and treatment of diseases of the skin.
- Reviewed, interpreted and summarized new clinical, scientific and research information in the study of dermatology, dermatologic surgery, pediatric dermatology, dermatopathology and cosmetic dermatology.
- Learned and improved techniques that will allow the physician to offer the best treatment options and care to patients.
- Expanded their expertise in select practical aspects of dermasurgery.
- Compared and contrasted methods in order to fully assess patient needs and treatment options.
- Improved standards of practice.
